

Helping You Protect Our Future

Cultured Stone® and ProStone® strives to meet today's building needs without compromising the world we leave to the future. Sustainability is at the heart of how we do business. Our commitment to thinking green and building green is evident in our design, manufacturing processes and the people behind our stone veneer brands.

Our Commitment to Thinking Green and Building Green

Protecting Well-being

We operate our manufacturing facilities in a manner that protects the health of both our employees and the environment.

Recycling Water

We introduced a system that allows the re-use of water during our manufacturing process. The results were a reduction of water consumption in 2006-2009 by 50% per ton of product produced in North America.

Reducing Waste

We implemented process changes that reduced our landfill waste by 80% per ton of product produced in 2009.

Championing Greener Communities

We believe being a good neighbour is a requirement, not an option. It's reflected in the way we encourage our employees and retirees to give back to the communities in which we operate.

CULTURED STONE®
The Preferred Name In Stone™

Cultured Stone® is the first masonry veneer manufacturer to receive approval by the National Association of Home Builders (NAHB).

The NAHB mark indicates third party approval that Cultured Stone® products contributes to specified green practices for the National Green Building Certification Standard™.

The GREENGUARD® Environmental Institute recently named Cultured Stone® and ProStone® products as the first veneer manufacturer to qualify for its Indoor Air Quality Certification and stringent Children & Schools product emissions standards.

The NAHB Research Center Green Approved mark is your assurance that a product is eligible for points toward National Green Building Certification. Visit www.GreenApprovedProducts.com for details.
